

BUZZ'N'SPOON™

The **ACTION** of a buzz blade,
the **WOBBLE & VIBRATION** of a spoon.

The new generation of
topwater lures has finally arrived.

This lure combines the noisemaking attraction of a **buzzbait** blade with the side-to-side wobble of a **spoon**. The buzz blade creates the surface action while the wobbling spoon creates subsurface flash, giving the illusion of an injured bait fish.

- 3/8 oz. head with high-quality silicone skirt
- heavy-duty casting spoon with erratic side-to-side action
- supersharp Mustad weedless single hook

Wild Shiner

This patent pending lure was designed to be fished on top and will elicit bonejarring strikes from active, top-of-the-line predators. The **Buzz'n'SPOON**, with its distinctive vibration patterns, is irresistible to fish and anglers alike.

This never-before-seen combination of attraction and the look of an easy meal is more than bass a can resist. **Fish fast or ultraslow** depending on conditions and the mood of the fish.

(This lure is shown at approximately 75% of actual size.)
